

	Element	Theme	To demonstrate
1	Hanging pendulum from roof Foucault's pendulum (moving)	The mind behind creation	Awe of the rotation of the earth in a church. Introduction to solar system.
2	2.5m illuminated moon (and other planets) hanging on roof (stationary)	The mind behind creation	The value of moon in tides (avoidance of stagnation), vacuuming meteorites (as Jupiter too), uniqueness of Earth, probability of other life
3	Lycra gravity well with planets. (activity)	The mind behind creation	Space time replaces gravity. We are all affecting each other. Space exists because mass exists.
4	Geiger counters and different elements (americium, radium and uranium) (activity)	God connection.	Apparent randomness of the releasing, long-term, of $\alpha\beta\gamma$ particles, and their effect of the world, even individually, through amplification.
5	DNA String (1000 of 4 billion sequence) (stationary)	Evolution	Sequence changes through $\alpha\beta\gamma$ particle impact and consequent development of us.
6	Fossils (and free give-away fossils for children)	Evolution	Stages in the evolution process. Glad I don't have to deal with T Rex.
7	Large Double pendulum (activity)	Chaos	Unpredictability of systems so with starting conditions cannot be replicated, the tiniest influence can be amplified by nature.
8	Magnetic pendulum with stick-it predictions hanging from the bell-tower. (activity)	Chaos	Ditto
9	Microscope connected to laptop. View cells (and muck and bacteria) on surface of hand. (activity)	Evolution	The vast activity we cannot see, going on to keep us afloat.
10	Light string, with one light splitting into two and travelling to opposite ends of the church. (moving)	Entanglement	Opportunity to talk about immediate connection across light years, and the reality that most of our atoms are likely to be entangled with others in the universe.
11	Fractal centre, with 10 tablets and mice. (activity)	Chaos	That apparent randomness can create infinite beauty.
12	Journey into Mandelbrot, projected. (moving) projected	Chaos	Ditto
13	What is Christianity – from a science perspective? Projected video	Overview	9.5 minute projection of why Christianity and Science are not mutually exclusive.
14	Diffraction of laser	Quantum Mechanics	Heisenberg uncertainty in all things.
15	Mist creator from the font	The mind behind creation	Cloud formation unpredictable
16	Craft your own book and leaflets centre	Leave with something	More to read
	Refreshment centre	Welcome	The church is happy to have you here.
